

WildCat Rollercoaster joins the
2011 Superior Plumbing
North Georgia State Fair

Hey Georgia, get ready to Take a Ride on the Wild Side! This year the Superior Plumbing North Georgia State Fair will be unveiling the biggest and most exciting ride yet! Proudly presenting the WildCat Rollercoaster! Designed by celebrated ride and coaster engineer, Anton Schwarzkopf, the WildCat has an overlapping and interlocking figure 8 configuration that sits 215 feet long, 75 feet deep, and 60 feet high. Topping out at a speed of 40 mph, the 4 person aerodynamic passenger cars allow for tight turns and hills that produce negative g-forces as well as strong lateral forces.

Drew Amusements owner Jimmy Drew is extremely excited to premier the WildCat. He says, "The WildCat is the largest rollercoaster at any fair in the United States. In addition to a fabulous blue and green paint job, and state of the art control system, we have installed magnetic breaks to insure a smooth and safe start and stop every time." The Superior Plumbing North Georgia State Fair will be one of only two fairs in the entire nation to have a WildCat Rollercoaster. According to Mr. Drew, "The WildCat Rollercoaster will, without question, propel the North Georgia State Fair to one of the premier fairs in the southeast."

Fair Manager, Tod Miller, adds "This is such an exciting time for the fair. We are honored that Drew Expositions has chosen our fair to install this awesome coaster. We continue to strive to provide families with the best entertainment for their hard-earned money".

Information: (770) 423-1330 or (770) 528-8989 after September 5
